+1 (888) 336-3734

Our most popular LNG solution, the Galileo Cryobox® is the world's first compact design and small footprint LNG station, producing volumes of up to 9,000-9,500 gallons per day.

With Verdek's Cryobox LNG solution, you can produce LNG at a low cost, safely and fully automated at your location.

Featuring Galileo
MX Compressors®

Key Features

Scalable solution that responds to changes in demand

Equipment housed in explosion-proof steel container

Can be used in tandem with Patagonia® storage and dispensing

Low power consumption and energy costs compared to traditional plants

Low installation costs and easy portability when wellheads are depleted

Can be used in conjunction with Verdek's LNG Virtual Pipeline

Software learns and anticipates peak demand

Plug and play with 24/7 remote monitoring through SCADA

Noise reduction and energy management system
