

Our plug and play solution for convenient, uncomplicated charging

Verdek's TurboDX* charging station from Webasto is a simple plug and play solution that operates without the need for an app or other device. This makes the TurboDX the perfect choice for both entry-level charging station owners and longtime EV veterans seeking a simpler charging experience.

TurboDX's slim and compact footprint allows it to fit in most garage configurations and public applications, and thanks to its modular design, you always have the option to expand the base station as more chargers are needed.

- 16A or 32A options available, with 25ft cable
- Compact and slim design
- Missing ground detection
- Can accommodate a dual, triple or quad installation
- Revolutionary leakage & thermal detection
- SAE J1772 compliant
- UL and cUL certified
- 3-year warranty

Safe From Shock

TurboDX's fully potted electronics reduce the risk of thermal shock, thermal dissipation, and static shock.

Smart Diagnostics

TurboDX will "Auto-Reboot" for issues during its self-check process and enact "Auto Recovery" if changes in voltage or temperature are detected.

Plug and Play

A truly plug and play solution, TurboDX does not require the use of an app, nor extra input from the station user.
