Capital to Be Mobilized in Canada for Natural Gas Technologies

A group of cleantech and natural gas stakeholders will be rolling out a new funding initiative in Canada aimed at opening up opportunities for the development of natural gas technologies for transportation applications.

The SD Natural Gas Fund, spearheaded by the Canadian government, Sustainable Development Technology Canada (SDTC) and the Canadian Gas Association, will target downstream natural gas sectors such as industrial, power generation and renewable natural gas, in addition to transportation. The fund will emphasize projects and products that stand to improve natural gas engines' efficiency, emissions and cost.

CEC Wants NGHEVs - Hybrid-Electric NGVs

The ship is equipped with a diesel-electric, dual-fuel propulsion system consisting of 2 × MAN 8L51/60DF and 2 × MAN 9L51/60DF engines, offering a total rated power of 34 MW, which were constructed at MAN Diesel & Turbo's Augsburg plant in Germany.

The propulsion facility provides the LNG carrier with a highly efficient, low-emission propulsion system, especially when running in gas mode.
